

My journey in KIT

It is the first time that I come Kirirom to live and to study also. When I first come here It is a bit harder for me to live because I'm not get used to with the weather over here and the food also. However, I really like the luxuries of nature and environment at Kirirom. For the first day of my class It is really hard for me to listen and to understand what teacher explained because I have never studied with foreign teacher before. But maybe for about two weeks later I could understand what teacher said. I try to learn the new words every day and do a note. For English subject I have to follow all what Ms. Sheryl ask us to do. I have listened to the CNN news to improve my listening in English. Furthermore, I have been checking some difficult words to know it's meaning or asking my friend to make sure on those word. Moreover, I have completed every daily homework and weekly homework also. For my first times experience of listening to CNN news it is a bit harder for me to understand what the reporter going to say. I have spent more than 2 hours in a news. For weekly homework I have bought a book from IBC because I could not find the online books on social media. When I first read it I feel like I have a diamond in my hand. I really like this book so much and really enjoy in reading it all the time. I also have been reviewing some grammars that we have already studied and other English lesson as well. One more thing, I have been improving my speaking in front of many students and trying to pay more attention while studying in the class. If I don't understand about the lesson, I try to ask teacher and my friends, Taly, and Sothea also. For other subject It is also really hard for me when I first listened to the teachers because he spoke almost all the technical words. After class I tried to research more and more about the lesson and asked my friend to explained me too.
